Letter of Recommendation

To whom it may concern,

Please consider this letter of recommendation on behalf of Mr. Carsten Büche. I have known Mr. Carsten Büche for almost 3 years through his work as member of the system test group, responsible for test automation.

Mr. Carsten Büche was active in the system test of telephones. He was responsible for the quality assurance of the well-known, high-end SIP telephones "OpenStage" and in particular for the preparation and execution of automated tests. The key tool for test automation was Quick Test Professional. Mr. Carsten Büche worked successfully on the development of a test framework based heavily on the usage of that tool.

He was very efficient in assessing product quality and made excellent use of his in-depth knowledge of highly complex Quality Center features to analyze occurring problems and adapt automated tests and the Quality Center environment. This allowed us to work very efficient and to perform all needed tests on time.

He always accomplished his work to our utmost satisfaction. I deeply regret that Mr. Carsten Büche cannot longer work for our company and have no doubt that Mr. Carsten Büche will bring great benefit to any employer.

The distinguished aptitude of Mr. Carsten Büche in our company was his self-motivation and adaptive and well organized proceeding in all of his projects.

Yours sincerely,

Christoph Ludwig
R&D Engineer
Head of the System Test Devices
